The delegations thus conferred on the Management Board by the general meeting are valid until June 30, 2027 and have not been used at the date of this management report with the exception of the authorization to buy back shares up to a limit of 10% of the share capital and the authorization to allocate free shares for the benefit of employees and associated capital increases.

The Management Board proposes to the General Meeting to renew these delegations under the terms and conditions set out in resolutions 8 to 15.

Delegation of authority to be conferred on the Management Board to grant existing shares or shares to be issued without pre-emptive subscription rights to a category of persons

The general meeting, voting under the quorum and majority conditions of extraordinary general meetings, having reviewed the Management Board's report and the Statutory Auditors' special report, and voting in accordance with article L. 225-197-1 and article L. 22-10-59 of the French Commercial Code:

resolves that the total number of shares that may be allotted under this authorization may not exceed 3% of the share capital on the date of this authorization (44,000 shares), it being specified:

- that, in all cases, the total number of allocated free shares may not exceed 10% of the share capital at the date of allocation of the 2026 AGAs;
- that this ceiling does not take into account the number of shares to be issued in order to reserve the rights of holders of securities giving access to the Company's capital in the event of a transaction involving the Company's capital taking place during the vesting period referred to below;
- that no free shares may be allocated to employees or corporate officers each holding more than 10% of the share capital. In addition, an issue of free shares may not result in employees and corporate officers each holding more than 10% of the share capital.

sets the duration of this authorization at thirty-eight (38) months as from this meeting

resolves that the shares to be allotted under this authorization will be, at the discretion of the Management Board, either new shares resulting from a capital increase through the capitalization of reserves to be deducted from the Company's balance sheet reserves, profits or additional paid-in capital, and the creation of new ordinary shares with a par value of one euro (€1) each, or existing shares bought back by the Company in accordance with the law;

sets the minimum vesting period, after which the allotment of shares to their beneficiaries will become definitive, at one (1) year from the date of their allotment by the Management Board, and gives full powers to the Management Board to set, where applicable, a vesting period of more than one (1) year and/or a holding

period, it being specified that the combined vesting and holding periods may not be less than two (2) years, and that the Management Board may provide for vesting and holding periods longer than the minimum periods set above;

resolves, however, that the allotment of shares will become definitive before the end of the vesting period, in the event of the beneficiary's disability corresponding to classification in the second or third of the categories anticipated in article L. 341-4 of the French Social Security Code;

notes that during the holding period, the shares allocated will be personal, non-transferable and inalienable (except in the event of the death or disability of the beneficiary corresponding to classification in the second or third of the categories anticipated in article L. 341-4 of the French Social Security Code);

notes that the Beneficiaries will nevertheless have the status of shareholders and will enjoy all the rights attached to the shares allocated as from the expiry of the vesting period;

notes that this authorization entails the waiver by shareholders, in favor of the Beneficiaries of shares that may be issued as and when said shares are definitively allotted, of their pre-emptive subscription rights and of the portion of reserves to be deducted, where applicable, in the event of the issue of new shares;

notes that the Management Board will inform the ordinary general meeting each year of transactions carried out under this authorization;

resolves to give full powers to the Management Board to implement this delegation within the limits set out above, and within the limits set by the legal provisions in force and the Company's Articles of Association, and notably to:

- determine the identity of the Beneficiaries of the free share allocations, set the number of shares allocated to each of them;
- set the conditions and, where applicable, the criteria for granting the 2026 AGAs, notably making the definitive grant of the 2026 AGAs subject to performance conditions and/or conditions of the Beneficiary's presence within the Company;
- set the number of shares granted to corporate officers, which they are required to hold in registered form until they cease to hold office or are re-appointed;

- set the amount of reserves, profits or premiums to be incorporated into capital;
- set the dividend entitlement date, even retroactively, for newly issued shares;
- decide and record the capital increase(s) thus undertaken;
- where applicable, take all necessary measures to ensure compliance with the obligation to retain shares by Beneficiaries for the period decided by the Management Board;
- carry out all actions and formalities required to record the completion of the resulting capital increases in the event of bonus issues of new shares, amend the Articles of Association accordingly and, more generally, do whatever is necessary.

The average initial commitment period is 46.4 months, a level well above industry standards, which gives the Group high visibility and a predictable revenue base, two parameters favorable to cash generation and investment planning.

Strong turnover growth in 2025: +14% including +20% for subscriptions

Sidetrade recorded consolidated turnover of €61.4m in 2025, up 14% at constant exchange rates (+12% on a reported basis).

Subscriptions reached €53.5m in 2025, up +20% at constant exchange rates (+18% on a reported basis). On a like-for-like basis, excluding the consolidation of SHS Viveon in H2 2024 and ezyCollect in Q4 2025, organic growth stood at +10%, demonstrating the resilience of the Group's economic model in a macroeconomic context marked by high volatility.

Internationalization is a strong growth driver

In 2025, 71% of subscriptions are outside of France, a reflection of the Group's growth in its strategic markets. In this dynamic, North America recorded growth of +25% at constant exchange rates, becoming the Group's leading region and now accounting for 30% of the subscription turnover.

Increased attractiveness to multinationals

The rise of key accounts is continuing. Subscriptions from companies with a turnover of more than €2.5b now represent 54% of the 'Corporate' portfolio. This growth illustrates Sidetrade's relevance to multinationals.

The acquisition of ezyCollect in Asia-Pacific

Consolidated on October 1, 2025, ezyCollect contributed €2.2m to the turnover for the financial year. Its activities, linked to the Asia-Pacific region (Australia, New Zealand and the Philippines), represent 13% of global turnover in the second quarter of 2025. This new region is emerging as an additional growth driver for SMEs, a segment with high expansion potential and conducive to the adoption of agentic AI solutions.

Historical record of profitability: EBITDA up 22% to €13.4m, or 22% of turnover (+2 pts)

- Gross margin of €47.4m, up 10%, reaching 77% of turnover (81% on a like-for-like basis)

Sidetrade's gross margin in 2025 was €47.4m, up €4.3m compared to 2024, in a demanding macroeconomic context. The gross margin rate stands at 77% of consolidated turnover (compared to 78%

a year earlier), a mechanical decline linked to the consolidation of SHS Viveon and ezyCollect whose gross margins are in a convergence phase with that of the Group.

On a like-for-like basis, excluding the consolidation of these two acquisitions, the overall gross margin rate increased to 81% (vs. 80% in 2024) and remained stable at 92% for subscriptions alone, attesting to the solidity and resilience of the model.

- Record EBITDA of €13.4m (+22%), margin at 22% of turnover (26% on a like-for-like basis), up +2 pts. Sidetrade now includes EBITDA as a benchmark to assess operational performance before depreciation and impairment.

In 2025, EBITDA crossed the symbolic €13m mark for the first time, bringing the margin to 22% of global turnover, an increase of 2 points compared to 2024. On a like-for-like basis, excluding the consolidation of SHS Viveon and ezyCollect, the margin reached the threshold of 26% of turnover, an improvement of 5 points compared to 2024. The growth in recurring income, backed by a controlled cost base, generates an incremental profitability whose effects are amplified from year to year.

- EBIT at €10.3m (+23%), record turnover rate of 17% (20% on a like-for-like basis) EBIT reached €10.3m in 2025, a 23% increase compared to €8.4m recorded in 2024, or 17% of overall turnover (vs. 15% a year earlier). On a like-for-like basis, excluding the consolidation of SHS Viveon and ezyCollect, the rate reached the threshold of 20% of turnover, an improvement of 3 points compared to 2024.

This record profitability level illustrates the maturity of the business model and is the result of a combination of converging factors. In an environment marked by the wait-and-see attitude of companies relative to their investments, Sidetrade benefited from the dynamics of its recurring income while maintaining rigorous budgetary discipline and reinforcing operational efficiency.

This result is all the more significant as it was achieved while maintaining an ambitious investment policy: €2.2m in additional R&D expenditures, devoted primarily to the development of agentic AI, thereby positioning Sidetrade at the technological frontier of its market.

The 2025 EBIT also includes a Research Tax Credit of €3.5m (compared to €2.6m in 2024) as well as a marginal activation of R&D expenses (€0.2m, i.e. 1.5% of gross R&D costs for the year).

Ultimately, the increase in the operating margin rate to 17% (20% on a like-for-like basis), from 15% in 2024, reflects the achievement of a new break-even point, leveraged by the company's business model.

Confirmed operational leverage: net income of €9.0m (+14%)

The financial result amounted to €0.1m in 2025 (compared to €0.7m in 2024), mainly reflecting interest income related to the short-term cash investments, which were partly affected by exchange losses over the period.

The corporate income tax charge is estimated at €1.3m in 2025, compared to €1.1m in 2024, in line with the improvement in operating profitability.

Finally, the 14% increase in Sidetrade's net income in 2025, to €9.0m, confirms the Group's ability to reconcile turnover growth and accelerated profitability, despite an economic environment that remains tense.

A cash-generating model to drive growth

In 2025, Sidetrade had an operating cash flow of €8.7m (excluding the impact of the lag in the Research Tax Credit). This cash generation contributed in part to the financing of the acquisition of ezyCollect for an amount of €37.3m (€34.7m in cash and €2.6m in the form of Sidetrade free shares).

On December 31, 2025, Sidetrade had gross cash of €16.3m, compared to €25.2m on December 31, 2024. The Group also held 85,300 treasury shares, valued at €20.6m on December 31, 2025.

The financial debt at the end of 2025 amounted to €30.8m, mainly related to the financing of the ezyCollect acquisition via a loan of €25m over 7 years at a rate of 3.1%.

With a comfortable net cash position and controlled indebtedness, Sidetrade therefore has the flexibility to finance its investments and support its expansion, while maintaining a robust balance sheet profile.

3. Foreseeable evolution of the Group's situation

The year 2025 marks a turning point for Sidetrade. For the first time, our EBITDA exceeded the €13m mark, up by a very strong 22%, taking the margin to 22% of turnover, an all-time record. This result is a direct consequence of the ramp-up in subscriptions, up +20% at constant exchange rates, of which +10% is organic. Despite the dilutive impact of our last two acquisitions, SHS Viveon and ezyCollect, on our profitability, we're once again demonstrating that the acceleration of our subscription revenues systematically translates into a spectacular leverage effect on our profitability. This virtuous model is based on three pillars built methodically over the years. First pillar: our winning AI strategy, launched in 2015, whose foundations are based on our Data Lake, unique in the Order-to-Cash universe, made up of more than \$8 trillion in B2B transactions and more than 42 million companies. Backed by this hard-to-replicate asset, we've forged a considerable lead in the agentic AI wave, with the announcement nearly twelve months ago of our Aimie Agents, 24 of which are in production or being deployed. These Aimie Agents are just the preamble to a broader, more structured AI strategy, to be unveiled shortly. Second pillar: Sidetrade, whose offering is ranked in the Top 3 of world leaders by Gartner®, has succeeded with its internationalization, as 71% of its turnover is now generated outside France, with North America now its leading region. The acquisition of ezyCollect opens up a third continent, Asia-Pacific. Last but not least, the third pillar is the move upmarket within global companies, whose business processes are dense and extremely complex. Sidetrade now generates over 85% of its revenues from companies with a turnover in excess of \$1 billion. In four years, Sidetrade has practically doubled in size, establishing itself as a global player in its field, with record profitability, while mobilizing significant investments in AI and pursuing a bold external growth policy. Given the lightning advances in artificial intelligence, we'll be unveiling our new strategic plan on April 7: O2C Intelligence 2030. Sidetrade has the foundations and assets needed to lead the way in the ongoing revolution of agentic AI for Order-to-Cash.

7. Group Risk Management Policy

The current global economic situation related to the recession risk, continuing inflation and increasing rates are all risks that could impact the company's financial situation. The outbreak of a military conflict in the Middle East at the end of February 2026 introduced a further factor of uncertainty into the energy and financial markets, the potential effects of which the Company is monitoring on its customers' environment.

Inflation risk: Our solutions for securing and accelerating cash flow are even more relevant for companies in the current context. As such, we believe that our pricing power is correlated with rising inflation. On the one hand, almost all of our SaaS subscription contracts are automatically indexed annually to price changes, and on the other hand, the return on investment of our solutions is directly proportional to the cost of cash made available to our customers.

Rate risk: Due to the Group's good cash flow on December 31, 2025, and a borrowing situation with a hedged rate structure, the risk is limited.

Recession risk: As a result of the investment freeze, order intake could be weaker, with an impact on growth in 2026. The Company notes, however, that its cash-flow optimization solutions represent investments with a rapid, measurable return, a category that has historically proven to be more resilient in times of economic slowdown.

In addition, the main usual risks identified by the Company are summarized below:

Risks relating to the Group's business, notably those relating to market acceptance of the business model, which is a major strength of the software publisher - including acceptance of new pay-per-use pricing models -, those relating to competition, which could threaten the Company's leading position, those relating to the economic environment in the current context of liquidity crisis, those relating to data security, which are covered by a contract and a state-of-the-art technological organization, those relating to technological obsolescence, which would mean that the software would not meet future market demand, and those relating to scalability, which could lead to service unavailability.

In addition to these risks, there are those associated with the deployment of agentic artificial intelligence solutions, notably those related to model governance and compliance with applicable regulations.

Operational risks, particularly those related to dependence on key employees, heightened in the current context of tension over artificial intelligence talent.

Market risks, such as those associated with a portion of cash invested in French mutual funds (FCP) with a mix of equity and fixed income investments whose volatility has increased in the current geopolitical context, or those associated with foreign currency transactions, notably in pounds sterling and dollars, which may generate a foreign exchange risk for the Group.

Legal risks, including those covered by insurance, as well as risks related to changes in applicable regulatory frameworks.

Risks relating to shares, notably the fact that the Company's shares are not listed for trading on a regulated market and therefore do not benefit from the corresponding guarantees, and that the price of the Company's shares may fluctuate significantly.

Risks relating to the possibility of significant disposals of Sidetrade shares made possible by the improved liquidity of Sidetrade shares since the transfer to the E1 listing group of the Euronext Growth market.
