For the first time, Sidetrade has breached the €4 M threshold for turnover during a single quarter. The second quarter marks a gradual return to robust growth. Compared to the first quarter, second quarter turnover grew at 9%, highlighting a strong pace of growth during the first half.

Olivier Novasque, Sidetrade CEO, explains:

“At this half-way point of the year, our organic growth validates our choice of strategic investments. To establish ourselves as the key partner in the digitisation of customer financial relationships, Sidetrade benefits from two major strengths: a disruptive Cloud-based solution bolstered by specialist professional services, as well as a pan-European presence of well-resourced, motivated teams. Based on our stable financial strength, we will continue to invest. Sidetrade is in a very favourable position to fully reap the benefits of our Target25 strategy”.

Management is confident of the Group's ability to post overall growth through the 2015 period.
